

# WRENZ IVAN M. LAYLO

## FULL-STACK DEVELOPER | REACT & TYPESCRIPT | DJANGO & PYTHON

Abucay, Bataan, Philippines | 0956 593 5944 | wrenzivan2004@gmail.com

LinkedIn: linkedin.com/in/wrenzlaylo | GitHub: github.com/WrenzLaylo

### PROFESSIONAL SUMMARY

Full-stack developer and Computer Science graduate, Cum Laude, with experience delivering production web applications, REST APIs, mobile interfaces, WordPress solutions, and business automation. Work spans React, Next.js, React Native, TypeScript, Django REST Framework, PostgreSQL, Redis, authentication, API integrations, responsive UI, deployment, testing, and post-launch support.

### TECHNICAL SKILLS

**Frontend:** React, Next.js, React Native, Expo, TypeScript, JavaScript, Tailwind CSS, Material UI, Framer Motion, responsive design

**Backend:** Python, Django, Django REST Framework, REST APIs, Server-Sent Events, API versioning, approval workflows

**Databases & Infrastructure:** PostgreSQL, Redis, Prisma, SQLite, GitHub Actions, OAuth 2.0, scheduled jobs

**Authentication & Quality:** JWT, bcrypt, rate limiting, session revocation, audit logging, unit testing, regression testing, mobile QA

**Web Platforms & Integration:** WordPress, Gutenberg, ACF, PHP, WordPress REST API, Google Chat/Sheets/Drive APIs, SEO

### PROFESSIONAL EXPERIENCE

#### Freelance Full-Stack Web Developer | Self-Employed | 2026 - Present

- Develop and deploy responsive client websites, including everyday-rockstars.com, using React, Next.js, TypeScript, Tailwind CSS, and Material UI.
- Translate client requirements into reusable UI components, application flows, API integrations, SEO improvements, and tested desktop/mobile experiences.
- Manage deployment, troubleshooting, performance checks, security reviews, and post-launch maintenance for client-facing websites.

#### Full-Stack Developer / AI Engineer Intern | eBiZolution - Healthcare Portal with AI Assistant | 2026

- Built backend APIs with Django REST Framework, PostgreSQL, and Redis.
- Developed versioned diagnosis and medication APIs with approval workflows.
- Implemented AI response streaming through Server-Sent Events with safety validation.
- Added JWT authentication, Redis rate limiting, session management, revocation, and audit logging.

## CLIENT ENGINEERING EXPERIENCE

### Freelance Web Developer & Automation Engineer | AGG Doors | Client Project | 2026 - Present

- Developed and maintained production web functionality across WordPress, PHP, JavaScript, CSS, REST APIs, structured content, navigation, technical SEO, and responsive desktop/mobile interfaces.
- Built a Python integration pipeline across Google Chat, Google Sheets, and Google Drive with OAuth 2.0 authentication, event parsing, validation, formulas, account mapping, and scheduled execution.
- Created regression tests and read-only dry runs for edge cases including missing events, invalid chronology, account migrations, duplicate pauses, and incomplete records.
- Implemented reusable WordPress/ACF patterns, custom Code Snippets, Rank Math redirects, API-driven updates, rollback plans, and production read-back verification.
- Recovered 61 of 64 legacy pages, validated 104 images, audited 77 manual buttons, completed 153 PDF links, and reorganized a 75-item site navigation structure.

## SELECTED PROJECTS

### Katiwala - Filipino Home-Services Marketplace | Independent Project | 2026 - Present

- Developing a cross-platform marketplace with Expo, React Native, and TypeScript for customer and service-provider onboarding, service discovery, booking flows, and account management.
- Designed provider verification workflows with ID capture, editable OCR data, face capture, pending verification states, and companion web admin and marketing interfaces.
- Built trust-focused user flows and reusable mobile UI patterns for customer and provider experiences.

### LiPAD - AI-Powered Philippine License Plate Deblurring and Recognition | Thesis Project | 2025 - 2026

- Developed and tested a computer-vision system using CRNN and GAN models to enhance, deblur, and recognize Philippine license plates.
- Prepared image datasets through data gathering, cleaning, labeling support, preprocessing, and quality checks for model training and evaluation.
- Contributed to TensorFlow and PyTorch experimentation, model testing, performance analysis, and output-quality improvement.
- Presented the research at IRCITE 2026 and received Best Computer Science Thesis Paper and Presenter recognition.

### Everyday Rockstar - Production Marketing Website | Client Project | 2026

- Developed a responsive production website with React, TypeScript, and modern component-based styling for desktop and mobile audiences.
- Implemented polished interactions, conversion-focused content structure, deployment checks, mobile QA, and ongoing production maintenance.

## EDUCATION

### Bachelor of Science in Computer Science, Major in Data Science | Angeles University Foundation | Aug 2022 - Jun 2026

- Graduated Cum Laude
- Relevant coursework: Machine Learning, Artificial Intelligence, Data Mining, Database Systems, Software Engineering, Computer Vision

## ACHIEVEMENTS

- Best Computer Science Thesis Paper and Presenter, IRCITE 2026
- Presented thesis at IRCITE 2026
- 1st Place, JPCS Hackathon 2025
- Dean's Lister, Angeles University Foundation

## CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- CCNA: Introduction to Networks - Cisco
- Introduction to Data Science - Cisco
- National AI Prompt Design Challenge Philippines - Straits Interactive

## LANGUAGES

English - Professional working proficiency | Filipino - Native
